OneDrive Storage Engineer (M365)

Work Schedule: Day Shift - Mon-Fri

Customer Skill Level(s): Senior

Position Description:

Key Responsibilities:

- Lead the migration of data to Microsoft 365 (M365) and OneDrive, ensuring seamless integration and minimal disruption to business operations.
- Design and implement strategies for migrating data from on-premises NetApp storage to M365 and OneDrive, adhering to best practices and security standards.
- Manage and maintain global NetApp storage solutions, including configuration, optimization, and troubleshooting.
- Monitor storage performance and capacity utilization, implementing proactive measures to ensure scalability and reliability.
- Collaborate with cross-functional teams to gather requirements, define project scopes, and deliver storage solutions aligned with business objectives.
- Provide technical expertise and support for storage-related issues, including incident resolution and root cause analysis.
- Develop and maintain documentation, including system configurations, procedures, and operational guidelines.
- Implement and enforce data management policies, ensuring compliance with regulatory requirements and internal standards.
- Stay current with industry trends and emerging technologies related to storage and cloud computing, evaluating and recommending enhancements as appropriate.

Mandatory Skills:

Ability to work independently and collaboratively in a team-oriented environment

Excellent communication and interpersonal skills, with a customer-focused approach to service delivery

Experience with data replication, backup, and disaster recovery strategies in both cloud and on-premises environments

Expertise in migrating data to Microsoft 365 (M365) and OneDrive, with a solid understanding of cloud migration methodologies

In-depth knowledge of NetApp storage systems, including configuration, administration, and performance tuning

Proven experience as a Senior Storage Engineer or similar role, specializing in NetApp storage solutions

Strong analytical and problem-solving skills, with the ability to troubleshoot complex storage issues

Clearance: TS/SCI

Polygraph: FS

Training:

HS or GED and 19 Years Experience

Bachelors and 14 Years Experience

DoD 8570 IA Type: IAT Level 2

DoD 8570 CE Certification Requirements: CompTIA Security+ CE
